

Solution for atypical shipments

What is an atypical shipment?

It is a shipment that is difficult to handle. First of all, because it exceeds the permitted dimensions, weight, or does not have a regular shape, is inadequately packed, it is not possible to sort it on an automatic line.

Atypical shipment

- one side of the consignment is longer than the maximum permitted dimension
- maximum length of one side 200 cm
- consignments insufficiently packed
- consignments of a significantly irregular shape, consignments of which part protrudes, etc. unpacked car and motorcycle tyres (max. number of tyres without disc in one package 2 pcs max. 18", tyres with disc 1 pcs max. 18")
- consignments in the shape of a sack

PPL Parcel Max+ shipments forwarded to DHL Freight

- longest side more than 200 cm
- the sum of the circumference and length is more than 360 cm
- weight more than 50 kg
- tyres for cars and motorcycles of a size and quantity greater than that permitted (see Atypical consignment)

Exceptions

Shipments that do not fall into the category of atyp parcel

- envelopes and parcels in a bag (max. 60x40x36 cm, 3kg)
- compact bundle of max. two regular shaped parcels, regardless of their different sizes, with a solid base

Properly packaged shipment - more at www.ppl.cz
